### About the Event

Ben Brown Fine Arts, Hong Kong, is pleased to present the first solo exhibition in Asia of works by the internationally celebrated

Brazilian photographer [Vik Muniz](#). This exhibition will feature photographs from his recent Pictures of Magazines 2 series, in which the artist has carefully culled and torn pieces of paper from art, fashion and news magazines; amalgamated them into re-creation of iconic and historically significant paintings; and then photographed and magnified the images, resulting in evocative, exquisitely-detailed and entirely unique works of art. Muniz is renowned for his ingenious and laborious employment of unusual materials - like sugar, chocolate, diamonds, caviar, toys, paper hole-punches, junk, dry pigment - to reconstruct images, often art historically related that tap into the spectator's subconscious visual repository and beg for further investigation. Muniz's elaborate material creations in this case the magazine collages - are ephemeral; it is his masterly photographic documentation that is the final work of art, which intentionally many steps removed from the original image that inspired it.
